Concept Enclosure Design of battery

1. **RGB-level status indicator**
   - Multi-color LED showing battery status (e.g., charging, low power).
2. **RGB-level status indicator & Power button**
   - Dual-function LED (status display) and power button.
3. **Switch mode button**
   - Toggles between battery modes (e.g., eco, performance).
4. **USB Type-C interface**
   - Reversible port for charging/data transfer.
5. **Compact socket-fit architecture**
   - Space-efficient design for secure socket integration.
